

Iyiola Oluwatosin

Backend Developer — Software Engineer — Full Stack Developer

tosiniyiola00@gmail.com — GitHub — LinkedIn

Experience

Software Developer

CodeBoulevard, Remote

Jan 2023 – Present

- Refactored SQL queries and implemented indexes, reducing query latency by 30% and improving overall system throughput.
- Led back-end team to build scalable RESTful APIs handling over 100 daily requests with 99.9% uptime using Spring Boot.
- Automated deployment workflows via GitLab CI, cutting deployment time by 50% and enabling an increase in release cadence 30%.
- Integrated Redis for caching frequently accessed data, reducing DB load and improving page speed by 25%.
- Developed internal monitoring tools, decreasing the mean time to detect problems by 40% and improving the stability of the platform.
- Collaborated cross-functionally with front-end teams, reducing integration bugs by 40% through contract-based API development.

Backend Developer

Tiidelab, Remote

Jun 2022 – Dec 2022

- Developed RESTful endpoints that improve data retrieval by 15% across multiple modules.
- Enhanced back-end performance, decreasing average server response time by 15%.
- Built and integrated HR modules, improving onboarding efficiency by 25% for internal tools.
- Participated in daily standing ups and sprint reviews, helping increase team velocity by 20%.

Python/Django Developer

Zummit, Remote

Jan 2022 – Mar 2022

- Contributed to Django-based apps used by 300+ users, delivering features under tight timelines.
- Implemented secure authentication workflows, reducing unauthorized access by 30%.
- Optimized MySQL database schemas, decreasing the average query time by 20%.
- Identified and fixed 15+ critical bugs, reducing the server error rate by 20%.

Projects

- **Investire – AI Investment Platform (Spring Boot, Next.js, Python, AWS, Docker, Kubernetes):** Developed an intelligent trading platform that offers real-time stock, crypto, and commodity prices with AI-driven insights, personalized investment advice, automated strategies, and market predictions. Integrated financial APIs, microservices, and scalable cloud deployments. [Live Link](#)
- **TiideHR - Employee Management System (Node.js, MySQL, React):** Built an HR management solution that reduced manual admin workload by 40% through automation and streamlined workflows. [Live Link](#)
- **SayIT - Whistleblowing App (Node.js, MySQL, React):** Launched a secure, anonymous reporting tool adopted by 3+ organizations, increasing transparency by 60%. [Live Link](#)
- **Chatter - Web Conferencing App (Spring Boot, Next.js, Docker):** Engineered a real-time conferencing tool supporting 500+ concurrent users with resilient microservices and seamless UX. [Live Link](#)
- **Notez - Web Journal (Spring Boot, React, PostgreSQL, Docker, AWS):** Designed a journaling platform used by 100+ users for self-reflection and note-taking, hosted on scalable cloud infra. [Live Link](#)

Education

Bachelor of Science in Computer Science

University of Lagos

Skills

Backend Development: Java, Python, Spring Boot, Django, Node.js

Databases & Performance: MySQL, PostgreSQL, Redis, Query Optimization

DevOps & Cloud: Docker, Kubernetes, AWS, Linux

CI/CD Tools: GitLab CI, GitHub Actions, Jenkins

Frontend & APIs: React, Next.js, RESTful APIs, Microservices
